

# AEM EDS Knowledge Base — Index

This directory contains the complete AEM Edge Delivery Services knowledge base for Cursor IDE.

## Directory Structure

### reference-blocks/ — 5 Complete Reference Implementations

| Block            | Files                       | Description                                                     |
|------------------|-----------------------------|-----------------------------------------------------------------|
| text-callout/    | JS, CSS, JSON, HTML, README | <b>Canonical reference</b> — use as baseline for all new blocks |
| option-selector/ | JS, CSS, JSON, HTML         | Complex block with card selection, pricing, state management    |
| simple-cta/      | JS, CSS, JSON, HTML, README | Simple call-to-action button                                    |
| hero/            | JS, CSS, JSON               | Hero banner block                                               |
| product-hero/    | JS, CSS, JSON, README       | Product-specific hero variant                                   |

### utilities/ — Shared Helper Libraries

| File              | Description                                                                  |
|-------------------|------------------------------------------------------------------------------|
| block-helpers.js  | Production utility functions (extractors, responsive, grouping, toggle, env) |
| HELPERS_GUIDE.md  | API reference for all helper functions                                       |
| USAGE_EXAMPLES.md | Real-world usage examples                                                    |

**boilerplate/ — Adobe xwalk Boilerplate Core**

| File                                   | Description                                              |
|----------------------------------------|----------------------------------------------------------|
| <code>scripts.js</code>                | Page orchestrator (loadEager/Lazy/Delayed, decorateMain) |
| <code>aem.js</code>                    | AEM framework (RUM, block loading, decorators)           |
| <code>component-definition.json</code> | Component definitions for Universal Editor               |
| <code>component-models.json</code>     | Component models for Universal Editor                    |
| <code>package.json</code>              | Build scripts and dependencies                           |

## documentation/ — 15 Comprehensive Guides

| File                             | Topic                                           |
|----------------------------------|-------------------------------------------------|
| 00-HOLISTIC_VISION.md            | Project overview, 19-block design system vision |
| 01-FUNDAMENTALS.md               | Core EDS concepts, sections, blocks, decoration |
| 02-JSON_CONFIGURATION.md         | Complete JSON model/definition/filter patterns  |
| 03-BLOCK_JAVASCRIPT_PATTERN.md   | Standard JS implementation pattern              |
| 05-CSS_STYLING_APPROACH.md       | Basic CSS conventions (current)                 |
| 06-BLOCK_DESIGN_PHILOSOPHY.md    | Modularity, authorability, styleability         |
| 07-FOUNDATIONAL_BLOCKS.md        | 19 planned blocks with categories               |
| 08-BLOCK_SPECIFICATIONS.md       | Detailed specs for key blocks                   |
| 09-ANALYTICS_PATTERN.md          | Analytics system (reference only — NOT used)    |
| 10-PROJECT_STRUCTURE.md          | Repository organization and file conventions    |
| 11-IMPROVEMENTS_TO_REFERENCE.md  | Enhancements over xwalk boilerplate             |
| 12-DEVELOPMENT_PATTERNS.md       | Code standards and best practices               |
| 13-RESPONSIVE_DESIGN_STRATEGY.md | Mobile-first responsive approach                |
| 14-FUTURE_ROADMAP.md             | Phased enhancement plan                         |
| 16-BLOCK_DEVELOPMENT_TEMPLATE.md | Copy-paste template for new blocks              |

**analysis/ — Deep Analysis & Learnings**

| File                                         | Topic                                    |
|----------------------------------------------|------------------------------------------|
| DEEP_DIVE_ANALYSIS.md                        | Comprehensive project analysis report    |
| LEARNINGS.md                                 | Cumulative corrections through 5 phases  |
| SESSION_SUMMARY.md                           | Key patterns and architectural decisions |
| CHANGELOG.md                                 | Architectural evolution changelog        |
| MIGRATION_GUIDE.md                           | SCSS → CSS migration, file renaming      |
| BLOCK_CREATION_STANDARDS.md                  | Block Quad requirements                  |
| aem_element_grouping_analysis.md             | Underscore naming / element grouping     |
| AEM_EDS_Tabs_and_JSONMerge_Complete_Guide.md | Tabs implementation & merge-json-cli     |
